Carl Stearns Clancy, an American inventor and motorcycle enthusiast, and his companion, Walter Storey, an English journalist, set out from San Francisco in 1912, determined to ride their motorcycles around the world. This ambitious undertaking was fraught with unimaginable challenges, but Clancy and Storey were undeterred.

Their journey took them through some of the most remote and rugged terrain on Earth, from the deserts of North Africa to the mountains of Asia. They braved extreme weather conditions, treacherous roads, and countless mechanical breakdowns. But through it all, their determination never wavered.

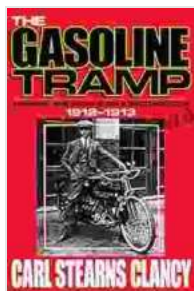

Along the way, Clancy and Storey encountered a diverse cast of characters, from curious villagers to suspicious officials. They learned about different cultures and traditions, and forged lifelong friendships with people from all walks of life.

Their journey was documented in Clancy's book, "Around the World on Motorcycle 1912-1913," which became an instant bestseller and a classic

of travel literature. The book is filled with vivid descriptions of their adventures, insightful observations on the people they met, and thrilling accounts of their triumphs and setbacks.

In addition to its literary value, "Around the World on Motorcycle 1912-1913" is also a valuable historical document. It provides a glimpse into a world that has long since disappeared, a world where travel was an adventure and the unknown lay just over the horizon.

Today, Clancy and Storey's journey remains an inspiration to adventurers and armchair travelers alike. It is a testament to the human spirit and the power of perseverance. And it is a story that will continue to be told and enjoyed for generations to come.
